Professional Summary

Flutter & iOS Developer with 2+ years of professional experience building production Android and iOS applications. Experienced in Flutter, Dart, Swift, REST API integration, Firebase, local databases, Riverpod, native iOS deployment, App Store releases, performance optimization, and clean architecture. Passionate about building scalable, polished, and production-ready mobile applications.

Professional Experience

Flutter Developer | GTS Infosoft LLP (22 Jan 2024 – Present)

- Developed and maintained cross-platform Flutter applications for Android and iOS.
- Integrated REST APIs, state management, optimized app performance, and resolved production issues.
- Collaborated with designers and backend developers to deliver high-quality mobile solutions.

iOS Developer | GTS Infosoft LLP (July 2024 – Present)

- Built and maintained iOS applications with Flutter and native iOS deployment.
- Managed App Store releases, certificates, provisioning profiles, and iOS-specific integrations.
- Ensured smooth app performance across Apple devices.

Technical Skills

Languages: Dart, Swift, Kotlin, Java, C++

Frameworks & SDKs: Flutter, Firebase

Backend & APIs: REST APIs, Cloud Firestore, Google Drive API

State Management: Riverpod, Bloc, Provider, ValueNotifier

Databases: SQLite, Hive, Cloud Firestore

Tools: Git, Android Studio, Xcode, VS Code, Figma

Platforms: Android, iOS, Web

Projects

PaathBook Bhasa

Flutter | Solely developed | Personal Product

Technologies: Flutter, Riverpod, Localization, Offline Dictionary, AI Fallback

- Designed the Flutter application structure for a personal product in active development.
- Built the foundation for reading, vocabulary, stories, and conversation-focused learning flows.
- Planned offline-first dictionary behavior, word normalization, localization, and gamified progress.
- Features include reading-first language acquisition, multi-language support, offline dictionary, AI-assisted fallback, vocabulary, stories, conversations, and gamification.

Store: Not published yet.

Khoj Samachar

Flutter | Solely developed

Technologies: Flutter, Dart, News Feed, Push Notifications, Method Channels, Native Android

- Solely developed the Flutter mobile application for Android and iOS release.
- Wrote native Android code for a home-screen widget that refreshes daily.
- Built a custom persistent notification experience.
- Handled notification scheduling through Flutter method channels.

Store: iOS | Android

WikiBG

Flutter | Solely developed

Technologies: Flutter, Dart, Content Platform, Editorial Workflow, Web Integration

- Solely developed the mobile app experience connected to the official WikiBG platform.
- Presented reviewed biography content in a mobile-friendly format.
- Focused on clarity, navigation, and trustworthy content consumption.

Store: iOS | Android

PaathBook

Flutter | Solely developed | Personal Product

Technologies: Flutter, Dart, Firebase, SQLite, Method Channels, PDF Tools

- Solely developed the personal Flutter product for Android and iOS.
- Implemented native notification scheduling through method channels.
- Built Firebase-to-local SQLite sync reducing backend reads.

Store: iOS | Android

EventLocal

Flutter

Technologies: Flutter, Dart, Push Notifications, Realtime Chat

- Implemented attendee access, networking, and engagement workflows.
- Supported real-time communication and event information.

Store: iOS | Android

The Academix

Flutter

Technologies: Flutter, Google Meet, Zoom, Google Drive, Cloud Services

- Developed academic workflow features.
- Integrated classroom, assessment, attendance, and collaboration experiences.

Store: iOS

DartsKey

Flutter

Technologies: Flutter, AI Camera Scoring, Bluetooth, Realtime Sync, Subscriptions, In-App Purchase

- Implemented in-app purchase flows.
- Developed darts game logic.
- Contributed to realtime synchronization.

Store: iOS | Android

Timelee

Native iOS

Technologies: Swift, Local Notifications, Location Monitoring, Offline Sync, In-App Purchase

- Built reminder workflows with local and location-based notifications.
- Implemented offline-first local storage with server sync.

Store: iOS

ScanPix**Native iOS**

Technologies: Swift, PDF, Edge Detection, Offline Sync, In-App Purchase

- Built document scanner with edge detection and editing.
- Implemented premium scanner functionality.

Store: iOS

Bender**Native iOS**

Technologies: Swift, Location Services, Realtime Messaging

- Implemented premium purchase flows.
- Built location-aware discovery and interaction features.

Store: iOS

Coaching Zone**Native iOS**

Technologies: Swift, Video Content, Team Management, In-App Purchase

- Implemented premium subscriptions.
- Developed coaching management features.

Store: iOS

Food Dudes**Native iOS**

Technologies: Swift, Maps, Payments, Push Notifications

- Developed restaurant discovery, ordering, and delivery features.
- Contributed to tracking-oriented app behavior.

Store: iOS

Education

Bachelor of Computer Applications (BCA)

Jai Narain Vyas University / Lucky Institute Of Professional Studies (2021–2024)

Studied software development, OOP, data structures, databases, operating systems, computer networks, and mobile application development.

Intermediate in Science (I.Sc.)

Kailali Model Secondary School (2017–2019)

Completed higher secondary education with science specialization and a strong foundation in mathematics, physics, computer science, and analytical problem solving.
